

Rémi Imbach

Curriculum Vitæ

Civil status: Rémi Imbach, born December 7, 1985 in Strasbourg
French citizen, married, one child.

Contacts: 58, route des Romains
67200 Strasbourg
+33 6 28 34 37 44
remi.imbach@laposte.net

Abstract

Last positions

- 2023 - now **Research Engineer**, IRMA¹, Université de Strasbourg (UdS), then IN-RIA² Nancy - Grand Est, France
- 2022 - 2023 **Research Engineer** INRIA Nancy - Grand Est, France
- 2020 - 2022 **Consultant**, independent; contracts with Waterloo Maple Incorporation, Canada, and European Science Foundation, France
- 2018 - 2020 **Assistant Professor**, Courant Institute of Mathematical Sciences (CIMS), New York University (NYU), New York, USA

Education

- 2013 **PhD in Computer Science**, UdS, France

Recent software

- 2025 **ScimBa**: Python library for Physics Informed Machine Learning. Backends Pytorch or Jax.
- 2023 **pwpoly**: C library for fast polynomial evaluation and root-finding, Python wrapper and Maple 2024³ module

Keywords

Scientific: Physics Informed Machine Learning, numeric and symbolic computation, certified computation, polynomial root finding, computer arithmetic

Technologies: Jax, Pytorch, Python, C, C++, CMake, Maple, git, L^AT_EX, CI, Linux

¹Research Institute for Advanced Mathematics

²National Institute for Research in Digital Science and Technology

³<https://www.maplesoft.com/>

Positions

since dec. 2024	Research Engineer , INRIA Nancy - Grand Est, France <i>Physics informed machine learning library</i> , MACARON ⁴ team software project: Scimba
2024 (10 mois)	Research Engineer , IRMA, UdS, France, <i>Radiative transfer: inverse problem for water turbidity measurment</i> , MOCO ⁵ team software project: AnaTrot (not published)
2022 - 2023 18 months	Research Engineer , INRIA Nancy - Grand Est, France <i>Implementation of a root-finding algorithm, integration in Maple</i> part of GAMBLE ⁶ team, work with G. Moroz (INRIA) Publication: [1] Software: HEFRoots, befft, PWPoly
2020 - 2022 20 months	Consultant , independent; contracts with V. Pan (CUNY ⁷), with Waterloo Maple Incorporation and with European Science Foundation ⁸ . Publications: [2, 3] Software: Ccluster, HEFRoots
2018 - 2020 28 months	Assistant Professor (without tenure), CIMS, NYU, USA <i>Research in symbolic computation and root-finding</i> with C. Yap and V. Pan Publications: [4, 5, 6, 7] Software: Ccluster Teaching: 125 hours
2017-2018 10 months	Scientific assistant , Technische Universität Kaiserslautern (TUK), Germany <i>Implementation of a near optimal root clustering algorithm</i> Part of AGAG team Publication: [8] Software: Ccluster
2014 - 2016 24 months	Postdoctoral Researcher , INRIA Nancy - Grand Est, France <i>Certified numerical algorithms for computing topology of curves and surfaces</i> Advisors: G. Moroz and M. Pouget Publications: [9, 10, 11, 12, 13] Software: subdivision_solver
2013 - 2014 11 months	Research and teaching fellow , UdS, ICube ⁹ laboratory, France <i>Reparameterization and homotopy for point distance constraint problems</i> Advisors: P. Mathis and P. Schreck, UdS Publication: [14] Teaching: 180 hours
2010 - 2013 36 months	PhD candidate , UdS, ICube lab., France <i>Solving geometric constraints by leading an homotopy method by geometry</i> Advisor: P. Mathis; Supervisor: P. Schreck Publications: [15, 16, 17, 18] PhD thesis: [19] Teaching: 3x64 hours

⁴MACHine leARning for Optimized Numerical methods

Software development

2024 -	ScimBa ¹⁰ : Python library, for Scientific Machine Learning. It offers cutting edge approaches for approximating solutions of PDE based problems such as PINNs, DeepRitz, DeepFlows, NeuralSemiLagrangian using efficient classical (SS-BFGS, SS-Broyden) and physics informed optimizer (natural gradients). Two backends: Jax and Pytorch.
2024	AnaTrot : Python code based on Pytorch for radiative transfer direct and inverse problem.
2022 - 2023	PWPoly ¹¹ : C library implementing algorithms for root finding and fast evaluation of univariate polynomials ([1]), with Python interface available in Maple 2024, <code>fsolve</code> ¹² command or <code>RootFinding:-Isolate</code> ¹³ , HR method $\simeq 20\,000$ lines of code
2022 - 2023	befft ¹⁴ : C library with Python interface for radix 2 FFT in machine doubles with guaranteed error bounds
2021 - 2022	HEFRoots : (first version of PWPoly) C library implementing a clustering algorithm ¹⁵ . Available in Maple 2023, <code>fsolve</code> ¹⁶ command or <code>RootFinding:-Isolate</code> ¹⁷ , HR method $\simeq 30\,000$ lines of code
2018 - 2020	Ccluster ¹⁸ : C library implementing a near optimal algorithm for root clustering ¹⁹ . Cited in [8, 3, 5]. $\simeq 35\,000$ lines of code
2014 - 2016	subdivision_solver ²⁰ : SageMath package for polynomial system solving. Designed for systems of huge polynomials (in <i>bitsize</i> and <i>degree</i>). Written in C++, Cython. Described in [12]. $\simeq 8\,000$ lines of code

Recent communications

- June 2026 *Workshop on Machine Learning and Automatic Differentiation in JAX for Scientific Computing*, Strasbourg²¹.
tutorial https://rimbach.gitlabpages.inria.fr/ml_ad_jax_sc_pinns_practical/
- May 2026 Summer School *Machine Learning + Simulation*, Sophia Antipolis²².
- Dec. 2025 Workshop *Fabrique Ton PINNs*²³, Sorbonne Université, Paris. Organized by Groupe Calcul, CNRS.
tutorial <https://rimbach.gitlabpages.inria.fr/fabrique-ton-pinns/>

Teaching experiences

- 2024 **Teaching fellow**, UFR MAI²⁴, Licence, 35h contact
- Summer 2018 to Spring 2020 **Responsible and main instructor** of *Mathematical Techniques for Computer Science Applications*, Master's students in Computer Science, CIMS, NYU, 125 hours lectures.
Syllabus: Linear algebra, probability, numeric methods for signal processing, computer graphics and machine learning. 1 grader, 1 teaching assistant.
- 2013 - 2014 **Teaching fellow**, UdS: 170 hours exercises sessions, 10 hours lectures
Responsible of *Algorithm and Coding*, under-graduate students in mathematics, physics and chemistry; 10h lectures in this course unit.
Exercises sessions in *graph theory, computers architecture, ...*
- 2010 - 2014 **Adjunct professor**, UdS: 3×64 hours exercises sessions in *theory of operating systems, computers architecture, graph theory, algorithms and coding, ...*

Education

- October 2013 **PhD** in Computer Science, UdS, France
Solving geometric constraints by leading an homotopy method by geometry
Advisor: P. Mathis; Supervisor: P. Schreck
Committee members: D. Michelucci, B. Mourrain, M.Tajine, P. Serré.
- June 2010 **Master's degree** in Computer Science, UdS
Specialty: Computer Science and Imaging
- September 2008 **Master's degree** in Mathematics, UdS
Specialty: Discrete Mathematics

Referees

Dr. Emmanuel Franck (`emmanuel.franck@inria.fr`) is researcher at INRIA Nancy-Grand Est, France

Dr. Guillaume Moroz (`guillaume.moroz@inria.fr`) is researcher at INRIA Nancy-Grand Est, France
INRIA Nancy-Grand Est 615 rue du jardin botanique 54600 Villers lès Nancy
+33 (0)3 54 95 84 79

Dr. Jürgen Gerhard (`jgerhard@maplesoft.com`) is Senior director of research at Maplesoft, Waterloo
Maple Incorporation

Pr. Victor Y. Pan (`victor.pan@lehman.cuny.edu`) is Distinguished professor of Math. at CUNY.
Graduate Center of the CUNY, 365 Fifth Avenue, New York, NY 10016-4309, USA

Scientific diffusion

Publications

In the community of symbolic computing where [1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 20] have been published, the usage is to make appear the names of the authors in their alphabetical order.

In the community of computer graphics where [14, 15, 16, 17, 18] have been disseminated, the usage is to make appear the name of the main contributor in first position.
